THE DECENTRALISED COOPERATION PORTAL ON FRANCE DIPLOMATIE

THE DECENTRALISED COOPERATION PORTAL ON FRANCE DIPLOMATIE

NEWS AND TOOLS DESIGNED TO HELP ALL THOSE INVOLVED IN DECENTRALISED COOPERATION

Launched in 2009 by the CNCD, the decentralised cooperation portal has become an inter-ministerial and multi-partner tool providing all those involved in decentralised cooperation current news and e-services. It helps make international action taken by local and regional authorities more visible and understandable. It likewise improves the coherency of France's response to global issues, respecting the autonomy of local government management while seeking to improve efficiency and coordination through consultation and networking.

It is a reliable information resource that aims to raise awareness about decentralised cooperation. It provides a series of innovative digital tools (including the French Atlas of Decentralised Cooperation, a Project Exchange and user-only professional space), making it a valuable work resource and tool to exchange and pool information.

LOCAL AND REGIONAL AUTHORITIES, EMBASSIES, PREFECTURES, ASSOCIATIONS, MINISTRIES AND AGENCIES...

THIS IS YOUR PORTAL

NEWS AND CALENDAR OF EVENTS

Both sections have been restructured to provide as much information as possible (major events, legal news, co-financing projects, CNCD activities).

A FRENCH ATLAS OF DECENTRALISED COOPERATION

The French Atlas of Decentralised Cooperation is basically a map of all international action taken by French local and regional authorities. It currently includes close to 13,000 decentralised cooperation projects conducted by over 4,800 French local and regional authorities with over 10,000 local government partners from 144 countries.

A DECENTRALISED COOPERATION PROJECT EXCHANGE

The decentralised cooperation Project Exchange is a platform for exchange that lists concrete projects conducted by local and regional authorities in our partner countries that might interest French local and regional authorities. Detailed information is provided on each project, while an interactive country-specific map enables you to view the geographic location of local development projects seeking cooperation.

THE 'CNCD A LA CARTE' EXTRANET: PROFESSIONAL AREA FOR REGISTERED USERS

The CNCD extranet system provides exclusive information and a series of strictly exclusive tools and services, including the possibility to save, view and manage your favourite news items, select and save maps from our Atlas of decentralised cooperation in your personal space, save any data you may have retrieved from the Atlas using the search engine in PDF format and manage your co-funding applications online.

E-CALL FOR PROPOSALS: ELECTRONIC SUBMISSION AND PROCESSING PROCEDURE

Local and regional authorities, prefectures, embassies, ministries and agencies have personal access to an area for online submission, consultation and management of calls for proposals to support decentralised cooperation.

E-ODA: ELECTRONIC DECLARATION OF OFFICIAL DEVELOPMENT ASSISTANCE

The annual reporting of local and regional authorities' official development assistance makes it easier to evaluate the efforts they are making in terms of development assistance, in international organisations. France is the only OECD member state to have switched to an electronic format for this data provision procedure, which facilitates the administrative tasks of local and regional authorities and provides more reliable data and automatically cross-referenced statistics.
